

The definitive online security package
ULTIMATE SECURITY 2012

The definitive online security package

K7 Ultimate Security 2012 offers complete PC protection with advanced Backup features. The integrated Cloud based Web Protection makes your online browsing experience safer than ever. Your USB disks will be also safe with comprehensive Device Control always on alert, taking care of potential malware infections. On top of this the intelligent firewall and spam filter are working in the background securing all incoming and outgoing traffic of your computer. The additional backup feature lets you backup your important documents and files and restore them when needed. K7 Ultimate Security fully protects your privacy and data, doesn't slow down your computer and its unobtrusive nature lets you do your work without interruptions.
